DETAILED ACTION

Action Summary

Acknowledgement is made of the receipt of applicant's response and remarks, filed April 10, 2003.

Claims 1-25 are active in this action.

Response to Arguments

Applicant's arguments filed April 10, 2003, have been fully considered but they are not persuasive. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. The rationale to modify or combine the prior art does not have to be expressly stated in the prior art; the rationale may be expressly or impliedly contained in the prior art or it may be reasoned from knowledge generally available to one of ordinary skill in the art, established scientific principles, or legal precedent established by prior case law. See *In re Fine*, 837 F.2d 1071, 5

USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). See also *In re Kotzab*, 217 F.3d 1365, 1370, 55 USPQ2d 1313, 1317 (Fed. Cir. 2000) (setting forth test for implicit teachings); *In re Eli Lilly & Co.*, 902 F.2d 943, 14 USPQ2d 1741 (Fed. Cir. 1990) (discussion of reliance on legal precedent); *In re Nilssen*, 851 F.2d 1401, 1403, 7 USPQ2d 1500, 1502 (Fed. Cir. 1988) (references do not have to explicitly suggest combining teachings). The reason or motivation to modify the reference may often suggest what the inventor has done, but for a different purpose or to solve a different problem. It is not necessary that the prior art suggest the combination to achieve the same advantage or result discovered by applicant. *In re Linter*, 458 F.2d 1013, 173 USPQ 560 (CCPA 1972) (discussed below); *In re Dillon*, 919 F.2d 688, 16 USPQ2d 1897 (Fed. Cir. 1990), cert. denied, 500 U.S. 904 (1991) (discussed below). Although *Ex parte Levengood*, 28 USPQ2d 1300, 1302 (Bd. Pat. App. & Inter. 1993) states that obviousness cannot be established by combining references “without also providing evidence of the motivating force which would impel one skilled in the art to do what the patent applicant has done” (emphasis added), reading the quotation in context it is clear that while there must be motivation to make the claimed invention, there is no requirement that the prior art provide the same reason as the applicant to make the claimed invention. “[I]n considering the disclosure of a reference, it is proper to take into account not only specific teachings of the reference but also the inferences which one skilled in the art

would reasonably be expected to draw therefrom.” In re Preda, 401 F.2d 825, 826, 159 USPQ 342, 344 (CCPA 1968). In this case, applicant indicates that column 2, lines 61-63 of the cited prior art reference states that sunflower seed oil is preferably the *only* liquid ingredient of the medium. This may be true, however, it is the position of the examiner that this statement does not preclude the referenced composition from combining more than one or other liquid or oil ingredients. Accordingly, one of ordinary skill in the art would be motivated to combine the teachings of the cited references with the expectation of formulating a stabilized and shelf-stable mixture to be used in various product applications.

The previous office action is reproduced below:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gehrman et al (US 4,518,696) in view of Desai et al (US 4,867,696). The claims are directed to a carrier for the delivery of a variety of ingestible substances.

Gehrman discloses a composition comprised of liquid suspensions of various species of lactobacillus provided as a dispersion of cells in sunflower seeds (Abstract and column 1, lines 55-63). Some or all of the bacteria are potentially useful for probiotic administration to domestic animals (column 2, lines 7-15). Gehrman does not teach fish oil or antioxidants, however, Desai ('696) teaches a microemulsion comprised of fish oils such as sardine, tuna, cod and salmon (column 3, lines 28-32). Optional ingredients include conventional antioxidants, flavorings and colorings. Suitable antioxidants include d-alpha-tocopherol (column 5, lines 38-41).

The cited prior art references do not teach applicant's claimed method, however, the act heating, mixing and cooling are not patentable characteristics. It is known by one skilled in the art that in order to combine components, one does so by mixing.

One of ordinary skill in the art would be motivated to combine the teachings of the cited references with the expectation of formulating a stabilized and shelf-stable mixture to be used in various product applications.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
